EXPERIENCE

Salesforce

Remote (San Francisco, CA)

Senior Software Engineer

Feb 2025 – Present

- Continued development of the setup-experience framework, focusing on setup flows for the company's AI-related features.
- Standardized previously fragmented, team-by-team setup flows across the platform, cutting duplicated engineering effort and improving feature adoption.
- Used Claude Code to orchestrate automated alert analysis, PR review, and bug triage, and developed reusable Claude skills to accelerate AI adoption across the company.
- Conducted technical interviews for intern and new-grad engineering candidates, assessing coding ability and problem-solving to inform hiring decisions.

Software Engineer

Mar 2021 – Feb 2025

- Contributed core pieces to a reusable setup-experience framework in Java and TypeScript/JavaScript, replacing bespoke per-team configuration flows with automated, guided setup pages.
- Built a framework for delivering in-app Salesforce training, with support for guided learning paths and milestone tracking, used by HR, UX, and external partners to author and deliver lessons.
- Designed the framework to let internal teams and external companies create and publish their own customized training content within the Salesforce experience.
- Built framework support for interactive lessons that tie into live in-org Salesforce objects, letting authors require users to create real records to demonstrate competency rather than passively complete material.
- Built framework support for leadership dashboards, enabling organizations to track learning completion and progress across their users.

IBM

Raleigh, NC

Java Software Developer

May 2018 – Mar 2021

- Contributed to the development of an Eclipse-based Integrated Development Environment.
- Collaborated with team members to design and integrate editor parsing changes based on internal and external feedback.
- Cooperated with external teams to guide integrations with the product.
- Helped lead the "zStart" group, created to help new hires adjust to work in the Systems department.

University of Tennessee, Knoxville

Knoxville, TN

Freelance Python Developer

Apr 2018 – May 2018

- Built Python web-scraping modules to collect and parse research data from multiple websites for the UTK College of Business.

hackUTK Cybersecurity Club

Knoxville, TN

Teaching Director

Aug 2017 – May 2018

- Aided with lesson plans and teaching sessions for club members.
- Designed challenges for and helped run two capture-the-flag (CTF) events.

Asurion

Nashville, TN

Software Engineer Intern

May 2017 – Aug 2017

- Scripted the collection and classification of private data fields in Python to help teams adhere to data privacy standards.
- Served as team leader for a group of fellow interns on a side project.
- Identified and reported an XSS vulnerability to the security team and recommended a fix.

EDUCATION

University of Tennessee, Knoxville

Aug 2014 – May 2018

B.S. in Computer Science, Minor in Cybersecurity

SKILLS

Languages: Java, TypeScript, JavaScript, Python, Kotlin

Frontend: Lightning Web Components (LWC), HTML, CSS

Tools & Practices: Git, Agile, Claude Code
